ABOUT ME

Full Stack Software Engineer with production experience across MERN, NestJS, TypeScript, PostgreSQL, PHP/MySQL, and React Native. I ship end-to-end products from APIs, auth and AI/LLM backends to polished dashboards. Currently contributing remotely to **NordLeads** (Poland), building a multi-tenant B2B outreach SaaS MVP focused on LLM-powered workflows, mailbox onboarding, trust, legal, and production UX quality.

WORK EXPERIENCE

Full Stack Software Engineer — NordLeads

Present

Poland (Remote) • Part-time • International SaaS team

- Building NordLeads multi-tenant B2B outreach SaaS MVP with **React 19**, **TypeScript**, **Vite**, **TanStack Query**, **React Router**, **i18n**.
- Integrated **LLM** into the platform for AI-assisted outreach and agent workflows, with human-in-the-loop (HITL) review.
- Built **Mailboxes onboarding** flow: connecting and verifying sender mailboxes with guided setup and status feedback.
- Shipped Trust & Legal: Privacy, Terms, Cookies, Acceptable Use, DPA, Accessibility Statement, About/Company.
- Delivered Help Center, Support Contact, AI Transparency, Security/Trust, Subprocessors, Status, What's New.
- Implemented register legal acknowledgement + legal versions/acceptances; fixed Playwright E2E/CI coverage.
- Added Settings Data & Privacy requests and production UX for Dashboard, Campaigns, Dispatch, Agent HITL.
